REGISTRATION OPEN FOR FIFTH INTERNATIONAL FASCIA RESEARCH CONGRESS

Registration is now open for the Fifth International Fascia Research Congress, which will be held in Berlin November 14-15, 2018 with Pre-Congress Workshops on November 13, 2018. The Congress will present the latest and most relevant fascia science with six keynote speakers, afternoon breakout sessions, a gallery of posters and abstracts, and a special Fascia Illuminated presentation showcasing photographs and videos of connective tissue. Seventeen pre-Congress workshops are available to Congress registrants.

An important continuing initiative of the FRC is to foster understanding and collaboration among scientists working in fascia research and the various clinical professionals who address fasciae in their work with clients and patients. It is a unique event that draws researchers from the fields of biomechanics, matrix biology, rehabilitation, and sports medicine, and clinicians including acupuncturists, chiropractors, massage therapists, osteopaths, physiatrists, and structural integrators.

Registration information is available at <http://fasciacongress.org/2018-congress/2018-registration/>.
